# **Insulated Roofing**Roof Panel Configuration

## **Insulation Cutback Areas - Optional**

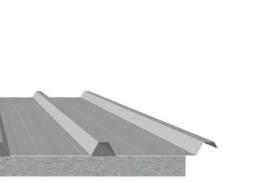

Panels can be manufactured with the insulated portion cut back from the front or rear edges of the panel to provide overhang area/s which may be needed to accommodate guttering or other structure specific to your project.

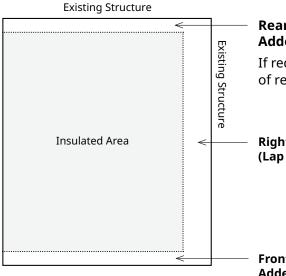

### **Dimensions:**

Cutbacks of 60mm (regular), 75mm, 100mm, 125mm, 150mm, 175mm, 200mm, 225mm and 250mm (max). No Cut Back also available.

## Direction of installation looking at the existing structure

Right to Left requires Right Hand Cutback:

### Rear Cutback Area Added (optional)

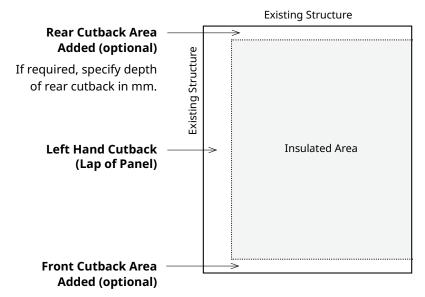

If required, specify depth of rear cutback in mm.

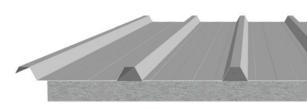

Right Hand Cutback (Lap of Panel)

Front Cutback Area Added (optional)

If required, specify depth of front cutback in mm.

# Left to Right requires Left Hand Cutback:

If cutback area/s are not specified, the insulation area will be flush with the front and rear edges of the steel sheeting.

If required, specify depth of front cutback in mm.
